

# From selected slab to finished component.

PORCELAIN FABRICATION IN TÜRKİYE

A technical partner for kitchen and bathroom manufacturers, furniture makers, distributors and architectural project teams.

## What we do

Zenith purchases ready-made porcelain, marble and quartz slabs and processes them into project-specific surfaces and components. We are a fabricator, not a manufacturer of raw porcelain slabs.

## Product and application scope

Kitchen countertops; bathroom tops and basins; porcelain tables; 3 mm furniture surfaces; interior wall, floor and stair cladding; bespoke hospitality interiors; CNC and waterjet contract fabrication.

## Production capabilities

GMM Italian 5-axis CNC; waterjet cutting; DRY CUT CNC glass cutting; Leica iCON iCS50 digital measurement; glass-porcelain lamination. Component geometry, supports and connections are reviewed for the selected material.

Slab brands considered for project selection include Dekton, Laminam, Neolith, Techlam, Lamar, Anatolia, Infinity, NG Kütahya, BiqStone and Xtone. Availability and suitability are confirmed per project.

# Prepare a useful export enquiry.

Send your destination country and city, product or component type, quantity, dimensions, drawings, preferred slab and requested date. Include the supporting structure and installation interfaces where relevant.

## Agree the scope before production

Material availability, drawing approval, sample requirements, minimum quantities, lead time and quality checks are agreed for the order. Packing, transport, insurance, unloading and installation responsibilities must also be confirmed in writing. No universal delivery, performance or certification promise is implied.

## Company identity

ZENITH PORCELAIN MOBİLYA SANAYİ TİCARET ANONİM ŞİRKETİ  
MERSİS: 0997189034500001 | Trade registry: 497339-5  
Registered: 19 December 2023
